(2) The cooperatively owned power supplier's forecast of the amount of harm, measured as a shifting of costs among member corporations, resulting from any reduced load with respect to the calendar year. Provides that in the required report to the IURC, a cooperatively owned power supplier must provide an explanation of the reasons for any difference in amounts reported for these two elements of stranded costs. Subject to certain protections for confidential or proprietary business information, requires: (1) a cooperatively owned power supplier to: (A) make a copy of each annual report available for inspection and copying at its offices; (B) post each annual report on the cooperatively owned power supplier's Internet web site, if any; and (C) maintain each annual report in an electronic format for a period of at
